MWG After the DMX IPO

Three-statement analysis, IPO bridge, sum-of-the-parts valuation and the non-DMX stub.

VND 13.3tn	166.4m	1,267.7m	~86%
gross proceeds	**shares issued**	**post-offer shares**	**MWG ownership**

Decision question

After valuing MWG's post-IPO stake in DMX, what value belongs to Bach Hoa Xanh, An Khang, AvaKids and parent-level adjustments?

Publication gate: this work sample does not publish an investment rating, target price or observed stub value without a verified share price, price date and diluted MWG share count.

1 · Transaction mechanics

DMX successfully issued 166,438,500 primary shares at VND 80,000. The unallocated shares were cancelled, so the actual post-offer share count is 1,267,722,000—not the larger planned count.

VND bn except shares	Planned	Actual close
Shares issued, mn	179.5004	166.4385
Post-offer shares, mn	1,280.7839	1,267.7220
Gross proceeds	14,360.032	13,315.080
Estimated issue costs	N/A	(100.000)
Estimated net proceeds	N/A	13,215.080
Post-money at VND80k	102,462.712	101,417.760

Resolution 15 earmarks estimated net proceeds of VND 13,215.08bn for debt repayment. The valuation labels this as a pro forma post-Q1 bridge until actual disbursement is evidenced.

2 · Perimeter control

Inside DMX	Outside DMX / MWG stub
TGDD, DMX, TopZone, DMX Technician, Super App, EraBlue 45% JV	Bach Hoa Xanh, An Khang, AvaKids, parent and other assets

EraBlue is equity accounted. A P/E based on NPAT already includes DMX's share of JV profit and must not add EraBlue again. An FCFF DCF may require a separate JV value at the equity bridge.

3 · Latest evidence

VND bn	1Q25	1Q26	YoY / change
Revenue	25,154	32,542	+29.4%
Gross profit	4,526	6,241	+37.9%
Gross margin	17.99%	19.18%	+119 bps
PBT	1,857	2,775	+49.5%
NPAT	1,478	2,219	+50.1%
CFO	2,477	864	39% of NPAT

Positive signal: revenue growth and margin expansion produced faster NPAT growth.

Watchpoint: Q1 operating cash flow was only 39% of NPAT because inventory increased and payables declined. The model therefore stresses inventory days and supplier funding instead of forecasting cash as a fixed percentage of earnings.

Six-month operating pulse

Unaudited 6M26 revenue reached VND 65,279bn, up 31% on the company's stated LFL basis and equal to 53% of annual guidance. SSSG was 32%; EraBlue reached 261 stores and reported 92% revenue growth. Q2/H1 financial statements were not available at the 13 July cut-off.

4 · Three-statement analysis

The historical module treats the income statement, balance sheet and cash-flow statement as one linked accounting system. FY2024 and FY2025 are audited; FY2023 is an unaudited comparative in the FY2024 filing. Q1 2026 is an unaudited trend update and is not annualised for conclusions on seasonality.

VND bn	FY2023A	FY2024A	FY2025A	Q1 2026A
Revenue	86,822	93,357	109,479	32,542
Gross profit	14,419	17,089	19,487	6,241
NPAT	1,346	3,717	5,802	2,219
Operating cash flow	2,357	6,243	5,017	864
Inventory	18,238	18,446	22,759	23,054
Total debt	20,306	19,930	23,429	22,159

Working-capital schedule

Period	DIO	DSO	DPO	CCC	CFO / NPAT	Inv. provision
FY2024A	88.0d	1.1d	28.3d	60.8d	168.0%	2.2%
FY2025A	83.6d	1.1d	32.5d	52.1d	86.5%	2.6%
Q1 2026A	78.4d	1.0d	31.3d	48.0d	38.9%	3.1%

CCC = DIO + DSO – DPO. FY2025 CCC improved to 52.1 days from 60.8 days, but full-year CFO/NPAT fell to 86.5%. Q1 2026 CFO/NPAT was only 38.9%; the 90-day CCC is shown as a seasonal diagnostic, not a full-year run rate.

Q1 2026 NPAT-to-CFO bridge

Bridge item	VND bn
Net profit after tax	2,218.6
Depreciation and amortization	137.8
Change in receivables	-79.6
Change in inventory	-434.8
Change in payables	-466.0
Corporate income tax paid	-780.3
Reported cash flow from operations	**863.7**

All NPAT-to-CFO, opening-to-closing cash and retained-earnings bridges reconcile. The FY2025 retained-earnings residual is labelled as capitalisation/other equity movement rather than being recast as operating performance. Normalisation is applied only where a disclosed perimeter difference exists; unsupported EBIT, debt, lease or minimum-cash adjustments remain N/A.

5 · Management reference case

VND bn	2025A LFL	2026F	2027F	2028F	2029F	2030F
Revenue	107,000	122,500	135,000	149,000	164,000	182,000
NPAT	6,075	7,350	8,500	9,800	11,300	13,000
Gross margin	17.1%	17.5%	17.8%	18.0%	18.3%	18.4%

These values are management projections, stored separately from independent Bear, Base and Bull scenarios.

6 · Valuation architecture

DMX

The workbook supports FCFF DCF and normalised earnings multiples. The transparent website lab uses forecast NPAT multiplied by a selected P/E, then applies MWG's post-IPO ownership.

MWG sum of the parts

MWG equity value
MWG share of DMX
+ non-DMX stub
± parent net cash, debt and corporate adjustments

7 · Scenario logic

Bear	Base	Bull
Lower SSSG and margin; inventory absorbs cash; lower multiple; larger parent deduction.	Guidance broadly achieved; gradual margin expansion; working capital normalises.	Services and EraBlue outperform; margin expands; cash conversion remains controlled.

VND bn	DMX equity	MWG share (~86%)	Stub	Parent adj.	MWG equity
Bear	67,000	57,620	28,000	(8,000)	77,620
Base	**90,405**	**77,748**	**45,000**	**(5,000)**	**117,748**
Bull	112,000	96,320	65,000	(3,000)	158,320

Illustrative equity values only; no per-share target, rating or market upside/downside is published.

8 · Catalysts and risks

Potential catalysts	Key risks
DMX price discovery; H1 statements; debt reduction and interest savings from IPO proceeds; EraBlue unit economics; BHX cash generation.	Demand normalisation; margin reversal; working-capital absorption; expansion before unit economics; persistent holdco discount.

9 · Analyst conclusion

The IPO makes MWG more analyzable, not automatically more valuable. Current evidence supports continued modelling: revenue growth and margin expansion are strong, while cash conversion remains the main financial watchpoint.

VALUE DMX ONCE	KEEP ERABLUE INSIDE DMX	VALUE THE STUB SEPARATELY	PUBLISH ONLY AFTER PRICE-DATE CONTROLS

Primary-source discipline

The repository contains a 29-document source register. Raw issuer files are excluded from Git because redistribution terms are not explicit; URLs, hashes, periods and document roles remain committed. The three-statement module contains 320 source-tagged historical facts; the separate Q1 data-pack extract retains 210 allowlisted facts.
